

# AutoMind AI Installation Guide

Complete installation and setup guide for AutoMind AI Desktop Application.

## 1. About AutoMind AI

AutoMind AI is an intelligent desktop platform that combines AI assistance, data analysis, coding environment, and competitive learning features.

The application provides:

- AI Chat Assistant
- DataLab
- CodeLab
- Coding Challenges
- Leaderboard System
- Global Contest Platform

AutoMind automatically prepares the required AI environment during first setup.

## 2. System Requirements

Minimum Requirements:

- Operating System: Windows 10 / Windows 11
- RAM: 8 GB minimum
- Storage: 10 GB free space
- Processor: Intel i5 / AMD equivalent
- Internet connection required for first-time setup

Recommended:

- 16 GB RAM
- SSD storage
- Stable internet connection

### 3. Download AutoMind

Visit the official AutoMind website: <https://automind-six.vercel.app/>

Download the latest AutoMind installer: AutoMind\_Setup.exe

### 4. Installing AutoMind

Step 1:

Open AutoMind\_Setup.exe.

Step 2:

Allow Windows permission if requested.

Step 3:

Follow the installation wizard.

Step 4:

Choose installation location and click Install.

Step 5:

After installation completes, launch AutoMind.

### 5. Automatic AI Setup

AutoMind performs automatic AI configuration. During first launch:

1. Application checks the AI environment.
2. If Ollama is not installed:  
AutoMind automatically downloads and installs Ollama.
3. AutoMind checks the required AI model.
4. If the model is unavailable:  
AutoMind automatically downloads the required model. No manual AI installation is required.

## 6. First Launch Process

The first launch may take longer because AI components are being prepared. The setup process includes:

- ✓ Installing AI engine
- ✓ Downloading AI model
- ✓ Configuring application environment
- ✓ Starting AutoMind workspace

After completion, AutoMind is ready to use.

## 7. Starting AutoMind

After successful installation:

- Open AutoMind from desktop shortcut.
- Sign in or continue based on available options.
- Access the AutoMind dashboard.

Available modules:

- AI Chat
- DataLab
- CodeLab
- Coding Challenges
- Leaderboard
- Global Contest

## 8. Troubleshooting

Installation is taking too long:

- Check internet connection.
- Ensure enough storage space is available.

AI setup failed:

- Restart AutoMind.
- Run the application again.

Application does not open:

- Restart Windows.
- Reinstall the latest version from the official website.

## 9. Updates

Always download the latest version of AutoMind from: <https://automind-six.vercel.app/>

New releases may include:

- Feature improvements
- Performance updates
- Bug fixes

## 10. Support

AutoMind AI Official Website:
